Certified HTML5 Developer

Certification Code VS-1029

HTML5 Developer Certification enables candidates to develop websites and web based applications which are having an increased demand in the industry. Nearly every sector requires professionals to develop HTML5 based application for various computing devices such as computers, mobiles and tablets.

Why should one take this certification?

The Certification is intended for professionals and technical graduates seeking career in HTML5 based website and web application development.

Indian IT industry is moving up the value curve and today's scenario demands more specialization. The certification is developed with a motive to enhance professional skills, thus making your job more challenging and rewarding. The certification helps extend web site development related skills and ultimately achieve proficiency at work.

Who will benefit from taking this certification?

This course benefits students who wish to make a career in web development industry. It is also well suited for professionals who are already working and would like to take certification for further career progression.

Students will be ready for job from day one since this is a high demand skill in software companies. Professionals already in the web development sector looking for job switch will also benefit from the certification.

The certification is designed to focus on development of employability skills essential for HTML5 based web development. It provides an opportunity for those who wish to work in an organization as web development professional.
