# Certified Router Support Professional

## Certification Code VS-1035

**Knowledge of Basic Network Support certification is pre-requisite.**

**Router Support Professional** helps demonstrate an individual's overall comprehension and expertise of supporting small and medium computer network. VSkills Router Support Professional Certification holders have more than a working familiarity with networks, switches and routers—they are technically skilled to take advantage of the breadth of features efficiently and effectively.

Router support consists of day-to-day support of computer network and optimizing computer networks with VLAN, STP and VLSM. It also involves protecting the network access by ACLs and linking with other routers by OSPF, RIP and EIGRP.

It is in great demand in IT infrastructure companies, data centers, MNCs, Corporates and Government organizations.

## Why should one take this certification?

This Course is intended for professionals and graduates wanting to excel in their chosen areas. It is also well suited for those who are already working and would like to take certification for further career progression.

Earning VSkills Router Support Professional Certification can help candidate differentiate in today's competitive job market, broaden their employment opportunities by displaying their advanced skills, and result in higher earning potential. VSkills Router Support Professional Certification can also lead to increased job satisfaction. Certified individuals have increased competence, productivity, and credibility with their employers, co-workers, and clients.

For employers, the certification provides skill-verification tools that not only help assess a person's skills in basic network support but also the ability to quickly complete on-the-job tasks across multiple programs.

## Who will benefit from taking this certification?

The certification benefits hardware engineers and professionals, networking engineers and professionals and students who want to present themselves as truly knowledgeable and differentiate themselves in a competitive job market. It also helps hiring managers make job placement decisions. Managers who hire candidates with a VSkills Router Professional Certification are helping minimize training costs.
