Certified Operations Manager

Certification Code:VS-1325

Operations management plays a vital role in producing and delivering goods and services to customers. It involves designing, planning, directing, and controlling the organization's resources and processes required to transform capital, skills, and materials into products and services. It is important that any operations strategy be aligned with the overall organizational business strategy for its success.

Why should one take this certification?

This course intends to help learners gain a basic understanding of the key concepts, functions, and goals of operations management in the services and manufacturing sectors. It introduces key functions that are part of operations in every organization and decisions associated with them. This course also walks you through some characteristics of operations strategies and different types of transformations of inputs into goods and services in a variety of industries.

Who will benefit from taking this certification?

Anyone working in operations management or another functional area, who is looking to gain a working understanding of the operations functions in a service or manufacturing organization
