Certificate in Digital Currency and CBDC

Digital currency refers to any form of currency that exists purely in digital or electronic form. It operates independently of any central authority, such as a government or central bank. Bitcoin and other cryptocurrencies are examples of digital currencies. They use cryptographic techniques to secure transactions and control the creation of new units.

CBDC stands for Central Bank Digital Currency, which is a digital form of a country's fiat currency (government-issued currency that is not backed by a physical commodity, like the US dollar or the Euro) issued by the central bank. CBDC is centralized and regulated by the country's monetary authority.

Note: Please note that only assessment is provided and no learning resources will be provided.

Why should one take Certificate in Digital Currency and CBDC?

Digital currencies and CBDCs can streamline financial transactions, making them faster and more cost-effective compared to traditional banking systems. They have the potential to improve financial inclusion by providing access to banking services for those without traditional bank accounts.

Digital currencies can simplify and expedite cross-border transactions, potentially reducing fees and transaction times.
